Network Update

CSCF Staff Meeting
2010-11-23

What's new with the network?

- EduRoam and uw-secure
  - uw-secure gone
  - EduRoam mixed results, please add comments to RT#74975
  - watch out for bogus SSIDs
- IST management of networks: transition planning taking place now
  - details unclear, day to day operations (ONA stuff) shouldn't change too much

...and

- IP address space
  - only 14 class "c" (/24) networks left in 129.97.0.0/16; need one or two per new building
  - vlans 74, 75, 78, 79 only 11% utilization
  - will be aggressively recovering unused names
  - movement of active names to follow
