I wrote you last week. Can you please get back to me about my return to work?

I wrose you ask week. Lain you present get curk, to me about my teatin in work?

By the way I received doday, a letter from London Life 1, quote:
"We received notice from your employer that you will be applying for Long Term Disability benefits"

Who invoked LTD? I did not ask for this, in fact I told my HR partners I was planning to return to work on May 8, 2022.

CC: Professor I ori Curtis (orev FALIW ren. current president FALIW)

Dear Professor Rush

These incuses began soon after I arrived at Wilderloo. These may broadly be described as a toxic work environment, which has also taken on academic bullying, both before and after the Pandemic.

These incuses began soon after I arrived at Wilderloo. I began seeing the FAUW about performance reviews and the lack of clairly on this topic. I have what some may call a disability, others may would call it anxiety and depression. The result is that I am unable to function

We previous accommodation focused on performance reviews, and on control over timing and choice of my teaching duties. In addition to duplicate sections, I was allowed control over sections so that I was not co teaching with others, a significant problem for me in the past. I began negociation with Sally Gunz and after many unsuccessful attempts, achieved an agreement in 2011. At that point we instituted a fixed performance review number and this was approved by a former Proved.

Since 2011 a lot has drawinged. In particular, 1 took medical leave in 2014, and did not neturn to teaching until 2016. Beginning 2016 i developed my own course, a project based course, which has high engagement students and has allowed me to flourish both in instruction and research.

As mentioned in previous correspondence I have continued to teach my project course, while negotication with Curtis. (FAUM, current President). This negotication was ongoing until the Pandemic sturted.

I am writing to ask that you,

remind you that medical accommodations do not specify a required work load or specific duties.

So far neither the Chair nor the Dean has addressed those issues. In fact, they have ignored my most recent medical documentation Lask that you inform me of your decision as soon as possible and certainly before my back to work date.

Sincerely, Richard Mann Waterloo ON

Augment A. Appeal of Suspension, Nov 11, 2021. See "Additional comments regarding the lack of consultation between the Dean of Mathematics and myself which must also be taken into consideration".

B. Correspondence with Occupational Health, Apr 8 2022.

. Correspondence with Chair, Apr 12, 2022.
