Notes on Enrolment

Spring 2024

This message is dated March 4, 2024.

In order to enrol in the course, follow the general instructions for enrolling in any graduate course at uWaterloo for Cheriton School grad students when enrolment opens up. If interest in the course exceeds the enrolment cap, I will maintain a waitlist of students trying to get into the course. Send me email indicating: your name, your email, your student ID. If a seat opens up, I will send you a permission number in order to enrol. Please note that this course will be delivered entirely online.

If you are interested in auditing the course, also send me an email with your name, email and student ID. I will correspond with further details.

Students who have enrolled in the course as of May 7 will receive an email from me indicating how they can join the first class online. The classes will be restricted to those who are enrolled, including those taking the course for credit and those approved for auditing. I may invite those at the top of the waitlist to also attend the first class so that they are up to speed with the course, in case seats become available.

Note that what Quest indicates as the current number of students enrolled in the course may be misleading. For one, Quest doesn't always update quickly if a student drops and makes a seat available. For another, I believe that audits appear as students in the total count on Quest but they do not take away seats from those who want to take the course for credit. The maximum number of students who can be enrolled for credit is fixed and cannot be exceeded. This is due to the structure of the course, with a certain time period and a certain number of presentations required of each student.
