

CS492 - Social Implications of Computing Winter 2018

Prof. Robin Cohen

Time and location: (MWF 930-1020am(sec2), 1030-1120am(sec1); QNC1506)

Trying to get into CS492? Don't ask me (Prof. Cohen). For Winter 2018, students can freely try to enrol on Quest. If the enrolment limit has already been met, then if current students choose to drop, there will be a spot to give. You are welcome to consult with CS Advisors if you have special circumstances, but the chances of receiving a permission number (aka override to enrol) are pretty close to zero. We are operating at full capacity this term with our two sections. The course is offered again Spring 2018.

Students trying to grab a free spot in the class are urged to do so ASAP and ideally before January 11, when the first assignment is due. Latecomers will still be required to complete this assignment. Please make your late arrival known to both Prof. Cohen rcohen@uwaterloo.ca AND with a required cc to head TA (for both sections) Alister Liao alister.liao@uwaterloo.ca

PLEASE NOTE: students enrolled in one section will NOT be able to attend the classes scheduled at the other timeslot. They MUST attend class during the timeslot of the section in which they are enrolled. No exceptions. This is to enable the required class participation.
