2022-2023 BCS + Artificial Intelligence Specialization

1. Please watch the “How to Pick Your CS Checklist and Fill it in” video.
2. Under Required Courses and Electives, check off the forty unique courses (20.0 units) that you have earned university credit for. Additional Elective Units can be any course for which you received university credit.
3. Verify that the Required Courses and Electives also satisfy the Additional Constraints.

- □ Depth - 1.5 units in the same subject where either:
  - (a) at least 0.5 unit is 3xx or higher, or
  - (b) all three form a prerequisite chain.
  Courses for breadth can also be used for depth.
  Write the non-math elective units from above that you will use for depth.

- □ Seven (regular) or eight (co-op) terms enrolled in at least three courses totaling 1.5 units
- □ No more than 2.0 units of failed courses

- □ Cumulative average of 60% or higher
- □ Co-op requirements met, if applicable, including PD 1, PD 11, PD 10, and a minimum of two other PD courses

---

1Communication List I: At least 60% in one of EMLS 101R, EMLS 102R, EMLS/ENGL 129R, ENGL 109, SPCOM 100, SPCOM 223.

3The courses below can be used to satisfy both the Communication List II requirement and 0.5 unit for the humanities (breadth) requirement.

If you use one of the Communication List II courses for humanities, then the checkbox will need to be replaced by any non-Math course.

4For ECE 380/SE 380, MATH 213 is an acceptable alternative for its noted prerequisite. Alternatively, ECE 380/SE 380 can be substituted with CS 480, CS 484, or CS 485. If this substitution is chosen, then the substituted CS course cannot be used towards the one of ‘three additional courses’ from List A.

5At least one of the ‘three additional courses’ must be from Math and at least one from Engineering. Special topics courses (e.g. CS 489) may sometimes be appropriate for this option; interested students should see a CS advisor for confirmation. Please note that you must complete the appropriate prerequisites in order to take the engineering courses required for AI specialization. In some cases, you may be required to take more courses beyond what is noted on the checklist. Engineering courses listed here cannot be used towards non-math electives.

6One of CS 480 and CS 485 is required. If both courses are taken, then one of them would count as one of 'three additional courses' from List A. However, please see the restriction noted for these courses in footnote #4.

Disclaimer: This checklist is a handy tool, but it is not a substitute for the official degree regulations. You may complete the checklist and ask a CS advisor to review it, but the student is ultimately responsible for ensuring that they have met their degree requirements. If there is a question of interpretation or a discrepancy, the University Calendar always takes precedence.
