

```
int main()
{
    int rc = 0;
    char *args[5];

    args[0] = (char *) "/uw-testbin/argtest";
    args[1] = (char *) "1";
    args[2] = (char *) "2";
    args[3] = (char *) "3";
    args[4] = 0;

    rc = execv("/uw-testbin/argtest", args);
    printf("If you see this execv failed\n");
    printf("rc = %d errno = %d\n", rc, errno);
    exit(0);
}
```
