

ERRATA v1.0

Last updated 20th August, 2019

The following errors or unclear passages should be corrected as follows. These errors will be corrected in future printings.

RULEBOOK

Page 8

"Move to an adjacent zone by secretly moving your player marker on your mini-board. You must then place a tracking card associated with your current position in front of your player screen, to your right. When you move to a zone, move the card on the right of your player screen to the left, and flip it facedown (ignore this for your first movement of the game). The previous leftmost card returns to your deck of tracking cards. "

should read,

"Move to an adjacent zone by secretly moving your player marker on your mini-board. You must then place in front of your screen, to your right, a tracking card associated with your current position. Slide to the left the card associated with your previous position, and take back the card associated to your position before that (ignore this for your first movement of the game). "

Page 9

Sentence added in bold:

Fuel Sources: Students can target fuel sources with any weapon to remove them from the board. However, exploding a fuel source causes everyone (Students AND Anomaly) in that zone to take 1 damage (so it's preferable to target fuel with a ranged weapon). **Students have to specifically target fuel sources to blown them up, they don't blow up automatically when a zone is attacked.** When the Anomaly feeds on a fuel source, it gains 1 HP and the fuel source is removed from the board.

Page 11

In the Adaptive paragraph, "Lightning" should be changed to "Overload".

PLAYER SCREENS

Change the Conduit Evolution summary on the player screens to match the rulebook.

FRENCH RULEBOOK

Page 5

"Désigner" should be corrected to "Désignez".

Page 8

Change the "Déplacement" paragraph to: "Déplacez-vous vers une zone adjacente en déplaçant secrètement votre pion joueur sur votre mini-plateau. Vous devez ensuite placer devant votre écran, à votre droite, une carte pistage associée à votre destination. Glissez vers la gauche la carte associée à votre position précédente, puis reprenez la carte associée à votre position avant celle-là (ignorez ceci lors de votre premier déplacement de la partie)."
