

Deliverable: #2 - Buddy Team's evaluation

Title: SE2: Software Design and Architecture (CS 446, ECE 452, CS 646)

Description:

Please read the proposal assigned to your team. Your goal is to see if:

- Which population of humans could be harmed by this app? The population may or may not be a user population mentioned in the proposal. Often times, developers think the app is intended for one user population, but they could be used by others and there are harms that may be present for unidentified user populations.
- What harms will each of the above identified populations face?
- Only one team member needs upload this document to Learn. PDF only.
 - File naming scheme: `cs446-d2_<your-project-name>.pdf` (use - instead of space in file names) (Use your project name so that it helps us grade)

You can use any material you can find from books or online in creating your lists but please cite your sources.

Deliverables:

Please submit a document that is at most 2 pages long.

Assessment:

This deliverable accounts for 3% of your final grade.
