Deliverable: #7 - Final Status Report
Title: SE2: Software Design and Architecture (CS 446, ECE 452, CS 646)

Description:

Do a demo. Save the world.

Requirements:

1. Title page, including project name, team name, and each team members name and Quest IDs, Github repo link.
2. Final status report (max 2 pages).
3. How you mitigated harm (1 page), and
4. Give an overview of what each member of your team did (1 page)
5. Must be compiled in a PDF document.
6. Only one team member needs to upload the document to Learn.
     - File naming scheme: `cs446-d7_<project-name>.pdf` * (use – instead of space in file names)

Required documentation:

Before the final exam a status report must be submitted. This report should detail the functionality your app embodies and list what proposed functionality remains unimplemented and why it was dropped. The intent of this report isn't to punish groups who did not implement everything they proposed but rather to help us understand the challenges your group faced while working on your project.

You will also write a page on how each of the harms detailed by the buddy team were mitigated by you. Did you modify a feature? If so how? Did you add a feature? If so so what is this?

Finally you write a page on what was done by each team member. This includes code and deliverables. Document which feature was done by whom. Document what in a deliverable was worked on by whom. Document all of these person by person. So essentially I want a list of things done for the project by each person. Key is Team member and Value is the list of things they did.

Written deliverable:

1. Metadata: Project title, team member names, team member Quest IDs.
2. Final status report (max 2 pages).
3. How you mitigated the harms? (1 page)
4. Description mapping team members to architectural-level components / design-level classes and deliverables documents (1 page).
5. Only one team member needs to upload this document to Learn. PDF only.
     File naming scheme: `cs446-d7_<project-name>.pdf` (use – instead of space in file names)

Assessment:

This deliverable is worth 5% of your final grade. A 2% bonus will be awarded to any group who can provide a link to their app in the Google Play Store in this deliverable. If you do not have an account and do not want to pay or sign up, you can ask us to upload the app. A 2% bonus will be awarded to any group who can provide a Youtube link to a 3 minute demo of their app.
