

Curriculum Vitae
Mark William Giesbrecht
Dean, Faculty of Mathematics
Full Professor with Tenure
Cheriton School of Computer Science
University of Waterloo
December 30, 2020

Personal Information

Current Address

Office of the Dean, Faculty of Mathematics
University of Waterloo
Waterloo, Ontario, Canada, N2L 3G1
Phone: +1 519 888 4080
Email: mwg@uwaterloo.ca
URL: <https://uwaterloo.ca/~mwg>

Education

Degree	University	Department	Year
Ph. D.	University of Toronto	Computer Science	1993
M. Sc.	University of Toronto	Computer Science	1988
B. Sc.	University of B.C.	Computer Science	1986

Employment History

Date	Position	Location
July 2020 – present	Dean	Faculty of Mathematics University of Waterloo
July 2014 – June 2020	Director of School	Cheriton School of Computer Science University of Waterloo
July 2012 – present	Full Professor with tenure	Cheriton School of Computer Science University of Waterloo
Jan. 2009 – July 2011	Associate Director	Cheriton School of Computer Science University of Waterloo
July 2001 – June 2012	Associate Professor with tenure	School of Computer Science University of Waterloo
Sept. 1998 – June 2001	Assistant Professor	Department of Computer Science University of Western Ontario
Jan. 1994 – July 1998	Assistant Professor	Department of Computer Science University of Manitoba
Aug. 1991 – Dec 1994	Compiler Researcher and Developer	Compiler Optimization Group IBM Canada Ltd.

Awards and Honours

- Association for Computing Machinery (ACM) Distinguished Scientist. Conferred November 2013.
- Synergy Award for Innovation. Natural Sciences and Engineering Research Council of Canada (NSERC). The Symbolic Computation Group (Waterloo), with Maplesoft. 2004.

Scholarly and Professional Activities

National and International Level Service

- NSERC Computer Science Liaison Committee. 2015–2019.
- Member Scientific Committee. Scientist Mobility Station (SMS International), Guangxi University for Nationalities, Nanning, China. 2017–present.
- Chair of Panel of Experts, INRIA Evaluation Seminar of theme: *Algorithmics, Computer Algebra and Cryptology*. Chaired a panel of 10 reviewers in the evaluation of 10 INRIA teams. March 2015.
- External Reviewer for Graduate Programs, Department of Computer Science, University of Manitoba. May 2015.
- Chair, ACM Special Interest Group on Symbolic and Algebraic Manipulation (SIGSAM). Elected: August 2007–July 2009.
- Herzberg Prize Committee: Canada's top prize in Science and Engineering (Natural Sciences and Engineering Research Council of Canada), 2008.
- Brockhouse Prize for Interdisciplinary Research in Science and Engineering Committee: Canada's top prize in interdisciplinary research in Science and Engineering (Natural Sciences and Engineering Research Council of Canada), 2008.
- NSERC Discovery Grant Selection Committee Member, Natural Sciences and Engineering Research Council, GSC 331, August 2004–May 2007.
- Steering Committee Chair: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC). July 2006–July 2007.
- Steering Committee Member at Large. ACM International Symposium on Symbolic and Algebraic Computation (ISSAC). Elected July 2004–July 2006.
- NSF Grant Selection Panel Member: Numeric, Symbolic and Geometric Computation committee. January, 2000, 2006, 2010.

Editorial Service

- Editorial Board Member: Journal of Symbolic Computation. May 2003–present.
- Editor: Special Issue of the Journal of Symbolic Computation in Honour of the work of Joachim von zur Gathen (with Daniel Panario). Volume 47, Issue 4, April 2012.
- Editor: Special Issue of the Journal of Symbolic Computation in Honour of the work of Keith Geddes (with Stephen Watt). Volume 46, Issue 7, July 2011.
- Editor in Chief: ACM Communications in Computer Algebra. Bulletin of the ACM Special Interest Group in Symbolic and Algebraic Manipulation. 1999–2001.
- Proceedings Editor, International Symposium on Symbolic and Algebraic Computation (ISSAC), Oxford, U.K. 1994.

Conferences (Scientific and Program Committees)

- Program Committee Member: International Symposium on Symbolic and Algebraic Computation (ISSAC) 2019. Beijing, China. July 15–28, 2019.
- Program Committee Member: Algorithmic Number Theory Symposium (ANTS), University of Wisconsin, Madison, USA. July 16–20, 2018.

- Program Committee Member: International Symposium on Symbolic and Algebraic Computation (ISSAC) 2017. Kaiserslautern, Germany. July 25–28, 2017.
- Prize Selection Committee: ACM/SIGSAM Richard D. Jenks memorial Prize for Excellence in Software Engineering Applied to Computer Algebra. 2017.
- Program Co-organizer: Third Workshop on Hybrid Methodologies for Symbolic-Numeric Computation (embedded workshop in the International Congress of Industrial Applied Mathematics – ICIAM’15). Beijing, China, August 10–15, 2015.
- Program Committee Member: Workshop on Parallel Symbolic Computation (PASCO’15). Bath, UK, July 10–11, 2015.
- Program Committee Member: Workshop on Symbolic-Numeric Computing (SNC’14). Shanghai, China, July 28–31, 2014.
- Program Committee Member: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC’14), Kobe University, Kobe, Japan, July 23–25, 2014.
- Program Committee Chair: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC’13), Northeastern University, Boston, USA, June 26–29, 2013.
- Program Committee Member: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC’12). Grenoble, France. July 2012.
- Program Co-organizer: Second Fields Workshop on Hybrid Methodologies for Symbolic-Numeric Computation. Waterloo, Canada, November 16–19, 2011.
- Program Committee Member: ACM International Workshop on Symbolic Numeric Computation (SNC’11), San Jose California, USA, June 7–9, 2011.
- Program Co-organizer: SIAM/MSRI Workshop on Hybrid Methodologies for Symbolic-Numeric Computation. MSRI, Berkeley, USA, November 17–19, 2010.
- Program Committee Member: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC’09). Seoul, Korea. July 2009.
- Program Committee Member: Workshop on Symbolic-Numeric Computing (SNC’09). Kyoto, Japan, August 3–5, 2009.
- Program Committee Chair: Milestones in Computer Algebra (MICA’08), Trinidad and Tobago, May 1–3, 2008.
- Program Committee Member: ACM International Symposium on Symbolic Computation (ISSAC’05), Beijing, China, July, 2005.
- Program Committee Member: International Workshop on Symbolic Numeric Computing, Xi’an, China, July, 2005.
- Program Chair: IMACS Applications of Computer Algebra Conference, Raleigh, NC, USA, July 2003.
- Program Committee Member: ACM International Symposium on Symbolic Computation (ISSAC’03), Philadelphia, USA, July 2003.
- Program Committee Member: Symposium on Applied Algebra, Algebraic Algorithms and Error Correcting Codes (AAECC’01), Melbourne, Australia, November 2001.
- Program Committee Member: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC’98), Rostock, Germany. 1998.
- Program Committee member: ACM International Symposium on Symbolic and Algebraic Computation (ISSAC’94), Oxford, UK. 1994.

Conference Organization

- Session Organizer (with E. Kaltofen and W-s. Lee): *Sparse Models, Interpolation and Polynomials*.

SIAM Conference on Applied Algebraic Geometry (SIAM AG13). Ft. Collins, CO, USA. August 2013.

- Session Organizer (with J-G. Dumas): *Symbolic Matrix Algorithms*. International Linear Algebra Society Annual Meeting (ILAS 2013). Providence, RI, USA. June 2013.
- General Chair: Hybrid 2011–Fields Workshop on Symbolic-Numeric Computing. University of Waterloo, November 2011.
- General Chair: Jo60–Conference in honour of Joachim von zur Gathen at 60. Bonn, Germany, May 2010.
- Tutorial Chair: International Symposium on Symbolic and Algebra Computation (ISSAC 2011), San Jose, California. June 2011.
- Session Organizer, IMACS Applications of Computer Algebra Conference, Greece, June 2002.
- General Chair, East Coast Computer Algebra Day (ECCAD 2000). May 13, 2000. University of Western Ontario, London, ON, Canada.
- Organizing Committee member (Treasurer), ACM International Symposium on Symbolic and Algebraic Computation (ISSAC'99), Vancouver, Canada. 1999.

University Administrative Duties

July 2014–present: Director of Cheriton School of Computer Science

The Director is the chief officer for the Cheriton School of Computer Science, overseeing most aspects of School planning and operations. The School is the largest unit in the Faculty of Mathematics at the University of Waterloo, with more than 100 faculty members, 45 staff, 400 graduate students and 3500 undergraduate students.

Primary duties and directions taken during my tenure as Director include:

- **Hiring of faculty and staff.** The School has been actively hiring 4–8 professors per year for the past 5 years, as well as many lecturers and administrative staff. I have led these efforts and successfully hired more than 25 professors as Director in the past 5 years from some of the top academic institutions worldwide. As Director I set hiring priorities and negotiate targets and salaries, and privately interview every professorial candidate for approximately 1.5 hours (more than 100 in the past 5 years). The hiring process in the School is a highly collegial and tightly coordinated process, with active participation of the hiring committee (SACA) and the entire School of CS.
- **Fiscal and budgetary oversight.** The Director is responsible for School finances and oversees the annual budget of over \$26m and over \$35m in endowments. UW has shifted its budget model considerably over the past few years to a more resource-based approach, allowing CS some latitude to set its own expansion course and revenue streams. This includes my proposing and shepherding higher fees for international undergrad CS students, and higher-fee professional Master's programs. These will see substantial revenue increases, allowing us to keep the fees of domestic undergrads and research graduate students in check while maintaining a manageable student complement.
- **Promotion and tenure.** Typically 4–5 tenure and promotion cases are handled each year by an elected committee of the School, chaired by the Director. There are typically applications for Continuing Lecturer Status and 3-year renewals to consider and approve.
- **School Operations.** I lead an Executive Committee (EC) of principal officers of the School, who meet weekly to discuss policy, direction and operations.
- **Women in Computer Science.** In 2015 I augmented the Executive Committee with the new position of Director of Women in Computer Science, with a broad mandate and resources to address the ongoing and difficult issues of under-representation of women in our field. Since 2015 we have increased participation of women in our undergraduate programs from approximately 15% to 25%.
- **Space management and allocation.** Growth has put the School of CS at the limits of our current space, and I have been leading plans for expansion and renovations. This issue is given special impetus by the new budget model, and the potential for additional capital infrastructure.
- **Strategic plans.** I have been directly involved in the current Faculty of Math strategic plan exercise, and was involved in writing the previous Faculty Strategic Research Plan. I am now employing these as hiring and resource priorities.
- **Industrial relations.** As Director, I meet and work with many industrial representatives both within the local high-tech community and abroad, to foster and facilitate CS-industry collaboration and sponsorship, through grants, investments, donations and other partnership agreements.
- **Development and fundraising.** As Director, I am active in meeting with alumni around the world, as well as hosting events on campus and off. A substantial and growing endowment allows us to sponsor priority projects, research chairs, and scholarships.
- **Inter-university agreements.** The School actively engages in relationships with top universities and industry labs around the world. I have been leading efforts to augment existing relationships and develop new ones, especially in support of the CS graduate program.

- **Program and academic development.** The Director is ultimately responsible for overseeing the many academic programs in the School. I am particularly focussed on the development of appropriate new programs, especially those of an interdisciplinary nature. We have recently developed an exciting new professional graduate program at the Faculty level in Data Science & AI, and are now pursuing a similarly-structured program in Security and Privacy.
- **Faculty and staff performance evaluation and awards.** The Director is responsible for evaluation of all faculty members each year, for merit-based salary increments and for awards. An active Awards Committee nominates faculty members and students for major awards (i.e., NSERC awards, Royal Society members, ACM awards, etc.).
- **Faculty and University-level governance.** The Director serves on the Dean's Advisory Council to facilitate and inform plans and operations of the Faculty of Mathematics.

Significant University-Level Service (2015–2020)

- **Presidential Nominating Committee** – Math Faculty representative. November 2019 – present.
- **Vice-President, Academic & Provost Nominating Committee** – Math Faculty representative. September 2017 – January 2018.
- **University Senator** – Math Faculty representative. May 2016 – present.
 - Senate Executive Committee – May 2017 – present
 - Senate Finance Committee – May 2016 – April 2017

January 2009–June 2011: Associate Director, Cheriton School of Computer Science

This is a deputy Director position, providing executive input and support for the Director on important tasks around the School, and acting for the Director when he was unavailable. Committees and other activities included the following:

- Executive Committee
- Operations Committee
- Faculty Performance
- Evaluation Committee
- Space Allocation
- Budget oversight
- Tenure and Promotion Committee
- Undergraduate Academic Plans Committee (curriculum committee).
- Outreach Committee
- Lecturer Hiring Committee

July 2008–June 2009: Chair of Graduate Recruitment Committee

The Graduate Recruitment Chair's role is promoting, advertising and facilitating the recruitment of graduate students into the Cheriton School of Computer Science. This included producing promotional media, organizing recruiting events, and service to the School Graduate Committee.

July 2006–2008: Chair of Undergraduate Recruitment Committee

The Undergraduate Recruitment Chair is charged with presenting, advertising and marketing the Cheriton School of Computer Science to potential undergraduate students. In 2006 undergraduate applications to Computer Science were at a low, and I implemented more active faculty presence at recruitment events, stronger literature and web presence, and revitalized outreach to high schools in southern Ontario and beyond. The impact was noticeable, and very valuable in the environment of the time. Many of these programs continue today, and we have a record number of applications to our CS programs.

July 2002–June 2005: Director of Undergraduate Studies

This was a new position in 2002 (with the creation of the School of Computer Science), combining the positions of undergraduate curriculum and operations chairs. My duties and achievements included:

- Chairing the Undergraduate Operations committee. This includes making teaching assignments for faculty, TA allocation and assignment, and overseeing the operation of the undergraduate program.
- Chairing the Undergraduate Academic Plans (curriculum) committee. Primary new projects of the committee included:
 - Development of the double degree in Business and Computer Science (BBA/BCS) between the Cheriton School of CS and the Wilfrid Laurier School of Business and Economics. This was not implemented until 2009 when I was the Associate Director of the School.
 - Development of the Bachelor of Computing and Financial Management Degree, between the Cheriton School of CS and the School of Accounting at Finance (UW).
 - Implementation of the more flexible Bachelor of Computer Science (BCS) degree, while updating the flagship BMath (Computer Science) degree, and development (and teaching) of a new core curriculum (esp. first year).
- Membership on the Software Engineering Curriculum and Operations Committees.
- Membership on the Faculty of Mathematics Undergraduate Affairs Committee, the primary faculty-level undergraduate oversight committee.

Teaching

Undergraduate Courses Taught and Developed

- Computer Science 135: Designing Functional Programs. University of Waterloo. Fall 2019.
- Computer Science 370: Scientific Computing. University of Waterloo. Fall 2013.
- Computer Science 136: Elementary Algorithm Design and Data Abstraction. University of Waterloo. Winter 2012, Spring 2007, Winter 2007, Winter 2005.
N.B. I developed the initial version and gave the first offering of this course following the creation of the new Scheme/Racket first year sequence (CS135/135) while I was the CS Director of Undergraduate Studies. The descendents of these courses are still the core first year curriculum for CS today.
- Computer Science 487/687: Introduction to Symbolic Computation. University of Waterloo. Winter 2009, Winter 2011.
- Computer Science 134: Principles of Computer Science. University of Waterloo. Fall 2003, Winter 2005.
- Computer Science 132: Developing Programming Principles. University of Waterloo. Winter 2003.
- Computer Science 130: Developing Programming Principles. University of Waterloo. Fall 2001.
- Computer Science 447a/545a: Compiler Theory. University of Western Ontario. Fall 2000.
- Computer Science 026: Fundamentals of Computer Science I. University of Western Ontario. Winter 2001.
- Computer Science 402b/535b: Distributed and Parallel Systems. University of Western Ontario. Winter 1999, Winter 2000.
- Computer Science 422a/539a: Foundations of Computer Algebra. University of Western Ontario. Winter 2001, Fall 1998.
- Computer Science 211a: Software Tools and Systems Programming. University of Western Ontario. Fall 1999, Fall 2000.
- Computer Science 101/102: Introductory Computer Science I, II. University of Manitoba. Fall 1997, Winter 1998, Summer 1998.
- Computer Science 206: Discrete Structures and Programming. University of Manitoba. Fall–Winter 1994–5, Summer 1995 (full year course).
- Computer Science 452: Undergraduate Thesis Coordinator. University of Manitoba. 1995–6.
- Computer Science 213: Discrete Mathematics for Computer Science. University of Manitoba. Summer 1996, Fall 1997.
- Computer Science 222: Introduction to Assembler Language Programming. University of Manitoba. Winter 1995.

Graduate Courses Taught and Developed

- Computer Science 887: Advanced Symbolic Computation. University of Waterloo. Spring 2007.
- Computer Science 780: Advanced Symbolic Computation. University of Waterloo. Winter 2004.
- Computer Science 887: Advanced Symbolic Computation. University of Waterloo. Winter 2002.
- Computer Science CS826b: Compiler Optimization. University of Western Ontario. Winter 1999, 2000, 2001.
- Computer Science CS827y: Seminar on Symbolic Mathematical Computation. Fall–Winter 2000.
- Computer Science 716: Computer Algebra: Algorithms and Applications. Winter 1996.
- Computer Science 721: Topics in Computer Algebra. Winter 1994.

Training of Highly Qualified Personnel

Current Postdoctoral Fellow Supervision

- Dr. Armin Jamshidpey. September 2018–present.

Current Graduate Supervision

- Jesse Elliott. PhD. September 2020–present. With Éric Schost.
- Saiyue Lyu. MMath. January 2019–present. With Arne Storjohann.

Completed Ph.D. Students

- Dr. Joseph Haraldson. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Matrix Polynomials and their Lower Rank Approximations*. Completed July 2019. Currently: Amazon Inc.
- Dr. Mustafa Elsheikh. PhD. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Smith Normal Form over Local Rings and Related Problems*. Completed August 2017. Currently: Facebook Inc.
- Dr. Albert Heinle. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Computational Approaches to Problems in Noncommutative Algebra—Theory, Applications and Implementations*. Completed September 2016. Currently: Aeryon Labs.
- Dr. Andrew Arnold. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Sparse polynomial interpolation and testing*. Completed March 2015. Currently: Google Inc.
- Dr. Daniel S. Roche. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Efficient Computation with Sparse and Dense Polynomials*. Completed June 2011. Currently: Associate Professor, Department of Computer Science, U.S. Naval Academy.
- Dr. Jason Selby. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Unconventional Applications of Compiler Analysis*. Completed August 2011. Currently: Kernel Developer, Maplesoft Inc.
- Dr. M. Jason Hinek. Cheriton School of Computer Science, University of Waterloo. Thesis title: *On the Security of Some Variants of RSA*. Completed May 2007. Currently: Lecturer, Carleton University, Ottawa.
- Dr. Yang Zhang. Department of Applied Mathematics, University of Western Ontario (with Greg Reid, UWO). Thesis title: *Algorithms for Non-Commutative Differential Operators*. Completed July 2004. Currently: Associate Professor, Department of Mathematics, University of Manitoba.

Completed Masters Students

- Mr. Jesse Elliott. Title: *Analysis of Randomized Algorithms in Real Algebraic Geometry*. With Éric Schost. Completed August 2020.
- Mr. Nam Pham. Cheriton School of Computer Science, University of Waterloo. Thesis title: *A Symbolic-Numeric Approach to the Projection Method*. Completed August 2016.
- Mr. Joseph Haraldson. Cheriton School of Computer Science, University of Waterloo (with George Labahn). Thesis title: *Computing Approximate GCRDs of Differential Polynomials*. Completed September 2015.
- Mr. Kelvin Chung. Cheriton School of Computer Science, University of Waterloo (with Ilias Kotsireas, WLU). Thesis title: *Using Integer Programming in Finding t -Designs*. Completed May 2012.
- Mr. Fei Wang. Cheriton School of Computer Science, University of Waterloo (with Ilias Kotsireas, WLU). Thesis title: *Finding Orthogonal Designs with Gröbner Bases*. Completed August 2011.

- Mr. Hrshikesh Tilak. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Computing sparse multiples of polynomials*. Completed August 2010.
- Mr. Ruitong Huang. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Decomposition of Finite-Dimensional Matrix Algebras over $\mathbb{F}_q(y)$* . Completed August 2010.
- Mr. Myung Sub Kim. Cheriton School of Computer Science, University of Waterloo. Thesis title: *Hermite form computation of matrices of differential polynomials*. Completed August 2009.
- Mr. Chao Li. Cheriton School of Computer Science, University of Waterloo (with Arne Storjohann). Thesis title: *Lattice Compression of Polynomial Matrices*. Completed May 2008.
- Mr. Bradford Hovinen. School of Computer Science, University of Waterloo. Thesis title: *Blocked Lanczos-style Algorithms over Small Finite Fields*. Completed September 2004.
- Mr. Brad Botting. School of Computer Science, University of Waterloo. Thesis title: *Structured Total Least Squares for Approximate Polynomial Operations*. Completed September 2004.
- Mr. Ivo Moravec. School of Computer Science, University of Waterloo. Thesis title: *Fast Arithmetic and Code Generation for Univariate Functions*. Completed January, 2004.
- Mr. Fraser Ruffell. School of Computer Science, University of Waterloo. Thesis title: *Lightweight Statistical Trace Selection for the Dynamic Optimization of Programs*. Completed January 2004.
- Mr. Jason Selby. Department of Computer Science, University of Western Ontario. Thesis title: *A framework for the automatic run-time specialization of Java bytecode*. Completed June 2001.
- Mr. Thulasiraman Jeyaraman. Department of Computer Science, University of Manitoba. Thesis title: *Run-time parallelization of irregular DOACROSS loops*. Completed October 1996.

Completed Postdoctoral Fellows

- Dr. Hui Huang. September 2017 – June 2020. With George Labahn. Currently: Assistant Professor, Dalian University of Technology, China.
- Dr. Qiaolong Huang. September 2018–September 2019. With Éric Schost.
- Dr. Andy Novocin. University of Waterloo. September 2011–August 2012. With George Labahn and Arne Storjohann. Currently: Associate Professor, University of Delaware.
- Dr. Clément Pernet. University of Waterloo. October 2006–2008. With George Labahn, Arne Storjohann and Keith Geddes. Currently: Maître de conférence, Université Grenoble Alpes, France.
- Dr. John May. University of Waterloo. September 2004–August 2006. With George Labahn and Arne Storjohann. Currently: Senior Software Developer, Maplesoft Inc.
- Dr. Pascal Giorgi. University of Waterloo. January 2005–December 2005. With George Labahn, Arne Storjohann and Keith Geddes. Currently: Associate Professor of Computer Science, University of Montpellier, France.
- Dr. Wen-Shin Lee, University of Waterloo. October 2001–October 2004. With G. Labahn. Currently: Lecturer, University of Sterling, Scotland.
- Dr. Arne Storjohann, University of Waterloo. July 2001–July 2002. Currently: Associate Professor, University of Waterloo.
- Dr. Arne Storjohann, University of Western Ontario. November 2000–July 2001. With R. Corless, D. Jeffrey, G. Reid, and S. Watt.
- Dr. William Naylor, University of Western Ontario. October 2000 –July 2001. With R. Corless, D. Jeffrey, G. Reid, and S. Watt.
- Dr. Ilias Kotsireas, University of Western Ontario. October 1999– November 2000. With R. Corless, D. Jeffrey, G. Reid, and S. Watt. Currently: Professor, Wilfrid Laurier University.
- Dr. Andreas Stein, University of Manitoba. 1997–1998. With Hugh C. Williams. Currently:

Professor, Universität Oldenburg, Germany.

Habilitation Committee Membership

- Referee for Habilitation Defence (Habilitation à diriger des Recherche): Dr. Clément Pernet. Université de Grenoble Alpes. Thesis title: *High Performance and Reliable Algebraic Computing*. November 21, 2014, Grenoble, France.

Ph.D. Committee Membership

- Dr. Javad Doliskani. Western University, London, Ontario. Thesis title: *Computing in Algebraic Closures of Finite Fields*. Supervisor: Dr. Éric Schost. Completed September 2015.
- Dr. Konstantin Ziegler. Department of Mathematics, University of Bonn. Thesis title: *Counting Classes of Special Polynomials*. Supervisor: Dr. Joachim von zur Gathen. Completed March 2015.
- Dr. Paul Vrbik. Western University, London, Ontario. Thesis title: *Computing Intersection Multiplicity via Triangular Decomposition*. Supervisors: Dr. Marc Moreno Maza and Dr. Éric Schost. Completed December 2014.
- Dr. Fayed Mohammad Mahdi Javadi. Simon Fraser University. Thesis title: *Efficient Algorithms for Computations with Sparse Polynomials*. Supervisor: Dr. Michael Monagan. Completed January 2011.
- Dr. John May. North Carolina State University. Thesis title: *Approximate Factorization Of Polynomials In Many Variables And Other Problems In Approximate Algebra Via Singular Value Decomposition Methods*, Supervisor: Dr. Erich Kaltofen. Completed May 2004.
- Dr. Thomas Cluzeau. L'Université de Limoges, Limoges, France. Thesis title: *Algorithmique modulaire des équations différentielles linéaires*, Supervisor: Dr. Moulay Barkatou and Jacques-Arthur Weil. Completed August 2004.
- Dr. Ha Le. School of Computer Science, University of Waterloo. Thesis title: *Algorithms for the construction of minimal telescopers*. Supervisor: Dr. K. Geddes. Completed February 2003.
- Mr. Howard Cheng. School of Computer Science, University of Waterloo, Canada. Supervisor: Dr. George Labahn. Completed June 2003.
- Dr. Jean-Guillaume Dumas. L'Institut National Polytechnique de Grenoble, Grenoble, France. Thesis title: *Algorithmes parallèles efficaces pour le calcul formel : algèbre linéaire et calcul dans des extensions algébriques*. Supervisor: Dr. T. Gautier. Completed December, 2000.
- Dr. Xianping Liu. Department of Applied Mathematics, University of Western Ontario, Canada. Thesis title: *Symbolic tools for the analysis of nonlinear dynamical systems*. Supervisor: Dr. R. Corless. Completed September 1999.

Masters Committee Membership

- Ms. Zheng Qin. School of Computer Science, University of Waterloo. Supervisor: Dr. M. McCool. Completed January, 2004.
- Ms. WeiWei Zheng. School of Computer Science, University of Waterloo. Thesis title: *High Precision Computing Using Iterative Refinement*. Supervisor: Dr. Keith Geddes. Completed September, 2002.
- Mr. Manqing Li. Department of Computer Science, University of Western Ontario. Thesis title: *An Analysis on the Efficient Predicate Dispatching Technique*. Supervisor: Dr. W. Holst. Completed January 2001.
- Ms. Dicheng Liu. Department of Computer Science, University of Western Ontario. Thesis title: *A Notation Selection Tool for MathML*. Supervisor: Dr. S. Watt. Completed January 2001.

- Mr. Gary Molenkamp. Department of Computer Science, University of Western Ontario. Thesis title: *Quality of service violation detection and location in distributed systems*. Supervisor: Dr. H. Lutfiyya. Completed September 2000.
- Mr. Edmund Daniel. Department of Computer Science, University of Western Ontario. Thesis title: *Performance management of distributed systems*. Supervisor: Dr. H. Lutfiyya. Completed December 1999.
- Mr. Nabil Obeid. Department of Computer Science, University of Western Ontario. Thesis title: *On the simplification of tensor expressions*. Supervisor: Dr. S. Watt. Completed May 2001.
- Mr. Xuehong Li. Department of Computer Science, University of Western Ontario. Thesis title: *XML and the communication of mathematical objects*. Supervisor: Dr. S. Watt. Completed April 1999.
- Ms. Yuxia Guo. Department of Computer Science, University of Western Ontario. Thesis title: *User/Group administration for RBAC*. Supervisor: Dr. S. Osborn. Completed May 1999.
- Mr. Mohammad Farook. Department of Computer Science, University of Manitoba. Thesis title: *Fine-granularity lock free data structures*. Supervisor: Dr. P. Graham. Completed October 1997.
- Mr. Michael Jacobson. Dept. of Computer Science, University of Manitoba. Thesis title: *Computational techniques in quadratic fields*. Supervisor: Dr. H.C. Williams. Completed August 1995.

Research Funding

All amounts in Canadian dollars

- 2018–2023.** Natural Sciences and Engineering Research Council (NSERC) Discovery Grant. Principal investigator on individual grant. Title: *Efficiency, Structure and Robustness in Algebraic Computation*. \$205,000 (\$41,000/yr)
- 2013–2018.** Natural Sciences and Engineering Research Council (NSERC) Discovery Grant. Principal investigator on individual grant. Title: *High performance algorithms for sparse and structured symbolic computations*. \$180,000 (\$36,000/yr)
- 2009–2011.** Mathematics of Information Technology and Complex Systems (MITACS) Consortium Grant. Title: *Mathematics of Computer Algebra and Analysis*. One of 12 co-investigators on multi-university (Waterloo, Western, Simon Fraser) grant, in collaboration with industrial partner Maplesoft Inc. \$500,000.
- 2008–2013.** Natural Sciences and Engineering Research Council (NSERC) Discovery Grant. Principal investigator on individual grant. Title: *Sparsity, Complexity and Practicality in Mathematical Computation*. \$160,000.
- 2007–2009.** Mathematics of Information Technology and Complex Systems (MITACS) Consortium Grant. Title: *Mathematics of Computer Algebra and Analysis*. One of 14 co-investigators on this multi-university (Waterloo, Western Ontario, Simon Fraser) grant, in collaboration with industrial partner Maplesoft Inc. \$500,000.
- 2005–2007.** Mathematics of Information Technology and Complex Systems (MITACS) Consortium Grant. Title: *Mathematics of Computer Algebra and Analysis*. One of 14 co-investigators on this multi-university (Waterloo, Western Ontario, Simon Fraser University) grant, in collaboration with industrial partner Maplesoft Inc. In this instance I was officially Principal Co-Investigator (with Peter Borwein, SFU). \$488,000
- 2004.** Natural Sciences and Engineering Research Council (NSERC) Synergy Award for Innovation. With 7 colleagues at Waterloo, Western and SFU, and Maplesoft Inc. The NSERC Synergy Award for Innovation is the national prize from the Canadian Natural Sciences and Engineering Research Council which recognizes examples of collaboration that stand as a model of effective partnership between industry and colleges or universities. \$25,000.
- 2005–2007.** Mathematics of Information Technology and Complex Systems (MITACS) Consortium Grant. Title: *Mathematics of Computer Algebra and Analysis*. One of 14 co-investigators on this multi-university (Waterloo, Western Ontario, Simon Fraser) grant, in collaboration with industrial partner Maplesoft Inc. In this instance I was officially Principal Investigator (with Peter Borwein, SFU). \$900,000.
- 2002–2006.** Natural Sciences Engineering Research Council (NSERC) Strategic Grant. Co-Principal Investigator with Stephen Watt (UWO). Title: *Compiler Middleware for Optimizing Evolving Research Programming Languages*. With industrial partners Maplesoft and IBM Canada. \$489,000.
- 2002–2008.** Natural Sciences and Engineering Research Council (NSERC) Discovery Grant. Principal investigator on individual grant. Title: *Exact and Approximate Algebraic Computation*. \$180,000.
- 2000.** Natural Sciences and Engineering Research Council (NSERC) Research Tools and Instruments Grant. I was Principal Investigator, with 3 other researchers. Title: *Symbolic Computation Server*. \$40,461.
- 1999–2003.** Ontario Research and Development Fund (ORDCF) Grant. Ontario Research Centre for Computer Algebra infrastructure funding. One of 6 researchers (non-PI) on grant to fund ORCCA Research Centre, of which I was a founding member. With industrial support of Maplesoft Inc.

\$6,160,000.

1992–2002. Natural Sciences and Engineering Research Council (NSERC) Discovery Grant. Principal investigator on individual grant. Title: *Efficient Symbolic Matrix Computations*. \$120,750.

Research Publications

Contributions with supervised students and postdocs are underlined.

Submitted for publication

- M. Giesbrecht, H. Huang, G. Labahn and E. Zima. *Efficient q -Integer Linear Decomposition of Multivariate Polynomials*. Submitted January 2020. J. of Symbolic Computation. 30pp.

2021

- M. Giesbrecht, A. Jamshidpey, É. Schost. *Subquadratic-Time Algorithms for Normal Bases*. To appear, Computational Complexity, 2021. Accepted December 2020. 34pp. arXiv:2005.03497
- M. Giesbrecht, J. Haraldson and G. Labahn. *Computing Nearby Non-trivial Smith Forms*. Journal of Symbolic Computation, v. 102, 2021, pages 304-327.

2020

- M. Giesbrecht, H. Huang, G. Labahn and E. Zima. *Efficient Rational Creative Telescoping*. Accepted for publication November 2020. J. of Symbolic Computation. 33pp.
- R. Corless, M. Giesbrecht and L. Rafiee Sevyeri and B.D. Saunders. *On Parametric Linear System Solving*. Proceedings of Computer Algebra in Scientific Computation (CASC 2020), pp. 188-205. Lecture Notes in Computer Science, v.12291. September 2020.
- M. Giesbrecht, Q.-L. Huang, É. Schost. *Sparse Multiplication for Skew Polynomials*. Proceedings of the 45th International Symposium on Symbolic and Algebraic Computation (ISSAC'20). pp. 194-201. July 2020.

Invited Talks (last 10 years)**2019**

- March 12, 2019. Invited speaker, Institute of Coding, University of Manchester. Computer Science Education at Scale, The Waterloo CS Experience 2006–2019.

2018

- September 14, 2018. Invited speaker, Department of Mathematics and Computer Science. University of Stirling, UK. Title: *Eigenvalues, invariant factors and algorithms for sparse integer matrices.*
- September 4, 2018. Invited speaker, Department of Applied Mathematics and Computer Science, Technical University of Denmark. Title: *Algorithms and statistics for additive polynomials.*
- August 30, 2018. Invited speaker, Department of Computer Science, Department of Computer Science, University of Copenhagen. Title: *Sparsity, Complexity and Practicality in Symbolic Computation.*
- June 11, 2018. Joint International Meeting of the Chinese Mathematical Society and American Mathematical Society. Fudan University, Shanghai, China. Title: *An optimization approach to low-rank approximation and interesting Smith forms of matrix polynomials.*
- June 5, 2018. Invited speaker. SMS Research Institute, Guangxi University for Nationalities, Nanning, China. Title: *Eigenvalues, invariant factors, and random integer matrices.*

2017

- May 17, 2018. Invited speaker. Research Institute for Symbolic Computation (RISC), Johannes Kepler Universität, Linz, Austria. Paule60 Workshop on Combinatorics, Special Functions and Computer Algebra. Title: *Eigenvalues, invariant factors and random integer matrices.* 2017
- November 17, 2017. Invited participant and speaker. Erwin Schrödinger Institute for Mathematics and Physics. Programme on Algorithmic and Enumerative Combinatorics, Workshop on Computer Algebra in Combinatorics. Title: *Quasideterminants, degree bounds and “fast” algorithms for matrices of differential and difference polynomials.*
- November 9, 2017. Invited speaker. Department of Applied Mathematics, University of Grenoble, France. Title: *Eigenvalues, invariant factors and random matrices.*
- April 20, 2017. Invited speaker. Department of Mathematics, North Carolina State University. Title: *Eigenvalues, invariant factors, and random integer matrices.*
- April 7, 2017. Invited speaker. Department of Computer Science, University of Delaware, Title: *Eigenvalues, invariant factors and random integer matrices (with a little bit of computing).* Conference for the retirement of B. David Saunders.

2016

- Kwan Chao-Chih Distinguished Lecture, Chinese Academy of Sciences, Beijing. July 1, 2016. Title: *Eigenvalues, invariant factors and random integer matrices.*
- PIMS Distinguished Lecture, University of Manitoba. Title: *Sparsity, Complexity and Practicality in Symbolic Computation.* March 17, 2016.

2015

- Invited Speaker: Department of Mathematics, Simon Fraser University, Vancouver. Title: *Eigenvalues, invariant factors and random integer matrices.* December 14, 2015.
- Invited Speaker: Workshop on Linear Computer Algebra and Symbolic-Numeric Computation, Fields Institute, Toronto. Title: *Quasideterminants, Degree Bounds and Algorithms for Matrices of Differential and Difference Polynomials.* October 27, 2015.
- Invited Colloquium Speaker: Department of Computer Science, CUNY Graduate Center, New

York. Title: *Sparsity, Complexity and Practicality in Symbolic Computation*. April 23, 2015.

- Invited Speaker: Department of Mathematics, CUNY Graduate Center, New York. Title: *Approximate Computation with Differential Polynomials: Approximate GCRDs*. April 23, 2015.

2014

- Invited Speaker: Department of Applied Mathematics, University of Western Ontario. Title: *What's in a random integer matrix?* March 26, 2014.
- Invited Speaker: b-IT Institute, Universität Bonn. Title: *What's in a random integer matrix?* May 8, 2014.
- Invited Speaker: Lehrstuhl D für Mathematik, RWTH Aachen University. Title: *Algorithms and statistics for additive polynomials*. May 13, 2014.
- Invited Speaker: Department of Mathematics, University of Newcastle, Australia. Title: *Algorithms and statistics for additive polynomials*. June 24, 2014
- Invited Colloquium Speaker: Université Joseph Fourier, Grenoble, France. Title: *Sparsity, complexity and practicality in symbolic computation*. November 20, 2014.

2013

- Invited Speaker: Special Semester on Applications of Algebra and Number Theory: Workshop on Computer Algebra and Polynomials. RICAM, Johannes Kepler University, Linz, Austria. Title: *Algorithms and Statistics for Additive Polynomials*. November 25–29, 2013.
- Invited Speaker: Research Institute for Symbolic Computation (RISC), Linz, Austria. *Quasideterminants and "Fast" Algorithms for Matrices of Ore Polynomials*. November 27, 2013.
- Speaker: SIAM Conference on Applied Algebraic Geometry. Colorado State University. Title: *New Approaches to Sparse Interpolation and Signal Reconstruction*. August 1–4, 2013.
- Invited Speaker. Canadian Discrete and Algorithmic Mathematics Conference (CanaDAM). St. John's, Newfoundland. Title: *Decomposition of additive polynomials and matrix similarity classes*. June 10–13, 2013.

2012

- Invited Speaker. Joint Mathematics Meeting (organized by the AMS and MAA), Special Session on Mathematics of Computation: Algebra and Number Theory. Boston, MA, USA. Talk title: *Counting decompositions of additive polynomials*. January 4–7, 2012.
- Invited Speaker: Symbolic Computation and its Applications (SCA). RWTH Aachen, Germany. Title: *Quasideterminants, Size Bounds and "Fast" Algorithms for Matrices of Ore Polynomials*. May 17–20, 2012.
- Plenary Speaker: East Coast Computer Algebra Day 2012 (ECCAD'12). Oakland University, Rochester Michigan. Title: *Sparsity, Complexity and Practicality in Algebraic Computation*. May 12, 2012.
- Invited Speaker: Department of Mathematics, North Carolina State University. Title: *Fast Computation of Smith Normal Forms of Sparse Matrices Over Local Rings*. April 4, 2012.

2011

- Plenary Speaker: MACIS 2011: Fourth International Conference on Mathematical Aspects of Computer and Information Sciences. Beijing, China. Title: *Sparsity and complexity in algebraic computation*. October 19–21, 2011.
- Invited Speaker: DEAM2, Conference on Differential Equations by Algebraic Methods. Johannes Kepler University, Linz, Austria. Title: *Provably Fast Algorithms for Normal Forms of Matrices of Ore Polynomials*. February 9–11, 2011.
- Invited Speaker: Department of Mathematics, Simon Fraser University, Vancouver Canada. Title:

Algorithms for Additive and Projective Polynomials. January 20, 2011.

2010

- Speaker: Jo60–Conference in honour of Joachim von zur Gathen. Title: *Decomposing for 24 years and counting the collisions*. May 29, 2010.
- Invited Speaker: University of Western Ontario. Title: *Algorithms for Additive and Projective Polynomials*. November 12, 2010.

2009

- Invited Speaker: NSF Workshop On Future Directions of Symbolic Computation Research And Their Applications to the Domain Sciences. University of Rhode Island. Title: *Sparse Polynomials, Models and Methods in Computer Algebra*. April 30–May 1, 2009.
- Invited Speaker: Dept. of Computer Science, University of Bonn, Germany. Title: *Some New Algorithms for Sparse Polynomials*. March 31, 2009.
- Invited Speaker: Dept. of Computer Science, University of Bath, UK. Title: *Some Dense Thoughts on Sparse Polynomials*. July 22, 2009.
- Invited Speaker: Dept. of Computer Science, University of Calgary, Canada. *Some Dense Thoughts on Sparse Polynomials*. August 12, 2009.

2008

- Invited Speaker: Conference on The Mathematical Interests of Peter Borwein. IRMACS, Simon Fraser University, Burnaby, British Columbia. May 12–16th, 2008.

2007

- Invited Speaker: Canadian Mathematics Society Winter Meeting, London, Ontario, Canada. Title: *New Algorithms for Lacunary Polynomials*. December 8–10, 2007.

2006

- Invited Speaker: Institut d'Informatique et Mathématique Appliquées de Grenoble (Institut IMAG), Grenoble, France. Title: *Interpolation of Sparse Approximate Polynomials*. April 6, 2006.
- Invited Speaker: Department of Mathematics and Computer Science, University of Antwerp, Belgium. Title: *The Riemannian SVD and Approximate Decomposition of Polynomials*. May 22, 2006.
- Invited Speaker: b-IT–Bonn-Aachen International Center for Information Technology. Title: *Complexity and Practicality in Computing with Integer Matrices*. May 25, 2006.
- Invited Speaker: Department of Mathematics and Statistics, Simon Fraser University. Title: *Probabilistically Stable Algorithms for Numerical Sparse Polynomial Interpolation*. August 9, 2006.
- Invited Speaker: Fields Institute Toronto–Workshop on Computational Challenges Arising in Algorithmic Number Theory and Cryptography. Title: *Speedy new algorithms for solving integer linear systems*. October 30–November 3, 2006.
- Invited Speaker: Department of Computer Science, University of Delaware. Title: *Probabilistically Stable Algorithms for Numerical Sparse Polynomial Interpolation*. November 22, 2006.
