Introduction to Database Management

M. Tamer Özsu (DC 3121; tozsu@db)

Frank W. Tompa (DC 1313; fwtompa@db)

Objectives

- To study databases from four viewpoints, in particular, those of the database user, the database designer, the database manager, and the database system implementer.

- Sub-objectives
  1. To understand the principles of relational database management systems and their languages – in particular SQL.
  2. To learn the methodology for building applications on top of database management systems – the so called data modeling process.
  3. To investigate the internal operations of relational database management systems.
